Suzana Sara Uvadiev

Junior Software Developer · Backend & Full-Stack

suzanamas13@gmail.com · linkedin.com/in/suzana-masturov · github.com/Suzana121

Profile

Recent B.Sc. Computer Science graduate focused on backend development. Built team and personal projects with Python, Flask, REST APIs, MongoDB and Firebase, from server logic through Android and web front ends. Brings 4 years of professional web development, currently responsible for website implementation.

Technical Skills

- **Languages:** Python, Kotlin, Java, C, C++, C#, JavaScript, SQL
- **Backend:** Flask, REST APIs, client-server architecture
- **Databases:** MongoDB, Firebase
- **Web & Mobile:** HTML, CSS, Android Studio, WordPress, Elementor
- **Tools:** Git, GitHub, Godot, Adobe Photoshop, Adobe Premiere Pro

Projects

Credit Card Fraud Detection System — Final Project (team project) · Python, Flask, Kotlin, JWT, Firebase, Android Studio, ML · github.com/Suzana121/Smart-Credit-Card-Transaction-Analysis

- Owned the entire backend: built the Flask server connecting the Android app to an ML model that detects anomalies in credit card transactions.
- Designed the REST API between the mobile client and the detection service, secured with JWT authentication.
- Used Firebase for backend services and data storage.
- Built Android screens in Kotlin and contributed to UX/UI design; collaborated with the team via Git/GitHub.

Online Courses Platform — Full-Stack Web App · Python, MongoDB, REST APIs · github.com/Suzana121/website-project-2025

- Built a course platform with user accounts, personal dashboards, and course access unlocked after purchase.

- Implemented backend logic for user management and access control, with data stored in MongoDB.
- Integrated external APIs into the application.

3D RPG Game (in progress) · Godot 4, GDScript · github.com/Suzana121/RPG-3D-Game

- Building a Skyrim-inspired 3D RPG with a modular architecture: player controller, interaction system and a data-driven inventory.

Experience

Web Developer · Kulialma Studio · Sep 2022–Present

- Built and maintained client websites with WordPress and Elementor, from implementation to content management.
- Delivered multiple client projects in parallel against requirements and deadlines.
- Created graphics and edited video for clients' digital content.

Education

B.Sc. Computer Science · The College of Management Academic Studies · 2023–2026

Relevant coursework: Object-Oriented Programming, Data Structures, Algorithms, Operating Systems, Computer Networks, Cybersecurity

Languages

Hebrew (native) · English (high proficiency) · Russian (good)
